The Honorable William K. Reilly  
Administrator  
Environmental Protection Agency  
401 M Street SW  
Washington, D.C. 20460

Dear Administrator Reilly:

As the Minority Spokesman of the Energy, Environment and Natural Resources Committee of the Illinois House of Representatives, I want to assure you that air quality is of great concern to me and the citizens of the State of Illinois. Unfortunately, it appears that this issue will become an even greater concern in the future if present trends continue.

I have been advised that tests have shown that a gasoline performance additive known as Hi Tec 3000 may reduce air pollution resulting from automobile emissions. It is my further understanding that the EPA is presently considering the use of this product in the United States. Because air quality is critical to all of us, I urge you and your agency to give this product your full attention and consideration.

Thank you for your efforts in addressing this very serious problem of air quality. Please feel free to contact my office if there is any additional information or assistance that I can provide for you.

Sincerely,

*William E. Peterson*  
William E. Peterson
